Subject: SHPO clearance for GOB Gas Vent Hole 5 and 6, Andalex Resources, Inc., Centennial Mine, C/007/0019, Task ID #2161, Outgoing File

Dear Mr. Dykman:

The Division of Oil, Gas and Mining is currently reviewing the GOB Gas Vent Hole project for the Centennial Mine. The Centennial Mine is in Carbon County, Utah. The proposed drill project area is in Township 12 South, Range 11 East, Section 31 (Refer to Deadman Canyon 7.5 Minute Quadrangle map).

The overall project includes eight drill holes. The Permittee, however, plans to drill two of the holes (GVH #5 and 6) in April/May 2005 as an essential action. The disturbed acreage for these drill holes is approximately 2 acres.

This essential action in April/May will not include ground surveys because of seasonal limitations. However, Senco-Phenix conducted a Class I survey of the area for this action. The Division will require an evaluation sometime this summer, as requested in your email dated March 16, 2005.

The Division requests concurrence from SHPO with our determination for GVH #5 and 6. The following provides pertinent information that may be useful during the consultation process. The Senco-Phenix literature search for the area resulted in the following surveys:

- Nickens and Associates 1984. Sample Oriented Cultural Resource Inventory. Permit number not provided.
- Senco-Phenix 1986. Title or permit number not provided.

After evaluating the Senco-Phenix (2005) Class I survey, the Division considers that the Permittee should not conduct additional surveys for these two holes because:

- GVH #5 and 6 are under critical status.
- The proposed site is not near sites included in or eligible for inclusion in the

NRHP, according to previous surveys of adjacent areas.

The Division makes the determination that the action will have "no effect" on historic resources and the Permittee should receive clearance. Final decision concerning the proposed action comes after the Division receives a response from SHPO.

The Permittee plans to start drilling GVH #5 and 6 in mid-April 2005. Although our office already contacted you on 3/16/2005 for informal comments for these two holes, we did not have the Senco-Phenix Class I survey report at that time. With this additional information, if you have any other comments concerning these two essential holes, we would appreciate your response as soon as possible.

If you have any questions about this project, please call me at (801) 538-5286 or Jerriann Ernsten at (801) 538-5214.

Sincerely,

D. Wayne Hedberg
Permit Supervisor
